

effective communication strategies

an education program by the alzheimer's association

Communication is more than just talking and listening – it's also about sending and receiving messages through attitude, tone of voice, facial expressions and body language. As people with Alzheimer's disease and other dementias progress in their journey and the ability to use words is lost, families need new ways to connect. Join us to explore how communication takes place when someone has Alzheimer's, learn to decode the verbal and behavioral messages delivered by someone with dementia, and identify strategies to help you connect and communicate at each stage of the disease.

Join us for a special presentation by the Alzheimer's Association at our May Support Group Meeting. Effective Communication Strategies - 6:30 to 8 p.m., Thursday, May 2nd at Crossview Covenant Church (2000 Howard Drive West, North Mankato, MN). This support group is affiliated with the Alzheimer's Association. For more information contact Freedom Home Care at 507.387.4663 or cnessler@freedomhomecarellc.com
