

Hospitals & rehabs full? FHC is here to help.

FHC is here to help patients transition safely home after a hospitalization or rehab stay. Discharges can happen fast. When patients understand all their options, it ensures a smooth, safe, and often times faster return to home. Call us right when you get an admit and we could do an over the phone consult for no charge.

What's the difference between home care and home health?

Home health care is clinical medical care provided by skilled medical professionals while home care is non-clinical services such as ADLs. [learn more.](#)

Combining services for a safe transition home

Dual discharges mean fewer readmission's. Freedom Home Care can provide services in collaboration with home health agencies to coordinate a safe discharge and prevent re-hospitalizations. [learn more.](#)
